Cosmetic companies in Nouvelle-Aquitaine, southwest France, meet the need to develop ingredients and niche cosmetic product ranges in direct relation with the producers.

These innovative SMEs, familiar with high-tech, have extensive know-how in new digital distribution channels.

Since January 2018, the Cosmetic Valley competitiveness cluster has opened an office in New Aquitaine to develop a network of local cosmetics companies, research laboratories and training organizations, within a national and international network.

- » Cosmetic Valley Competitiveness Cluster, the leading resource center world-wide in perfumery-cosmetics know-how, research and training, enabling regional companies to participate in calls for projects from the Cluster and to develop their businesses
- » Support for individual projects involving innovation and international development
- » Grouped participation in trade shows focusing on innovations in the international perfumery-cosmetic sector (Cosmetic 360, In Cosmetics)
- » The establishment of one DEST (territorial sectors of strategic excellence) addressing the topic of "Lipochemistry and enhancement of plant resources for cosmetic applications"
